

ROCKY MOUNTAIN SMITHS PRESENTS:

# Induction Forge Coil Building Workshop

November 15, 2025

Evan Blackstock & Scott Kretschmer

In this workshop we will demonstrate techniques for making a variety of coils, and coach you on making jigs, custom tools, and additional coils for your induction heater.

You must bring your own 1/4" copper tubing and corresponding flare nuts. 3/16" copper tubing is also useful for smaller or complex coils. Bring any coil making / tube bending tools or materials you have.

Limited to 6 people, due to the small workspace and tools needed.

Email Evan at [evan.blackstock@colorado.edu](mailto:evan.blackstock@colorado.edu) to sign up or ask questions.

The workshop will take place at Evan's home shop in Arvada:  
**The address is 9151 W 66th Ave Arvada, CO 80004.**

We will start at 9:00 am and work until we are done (or ~3:00 pm).

Feel free to bring lunch, or there are many food options nearby.

Cost: \$15.00 for RMS members, \$20.00 for non-members.

Additional fees for materials purchased may apply.
